Information

From its family ranch in California's San Joaquin Valley, Traina® Foods grows, sun dries and produces premium sun dried fruit for Industrial Ingredient and Foodservice customers around the world, and for our own line of Traina products which includes our award-winning Traina California Sun Dried Ketchups. That's what we do. Why we do it is another story.

Traina® Foods was founded on traditions our family brought from the old world, including time-honored methods of sun drying tomatoes and a food-lover's belief in the slower-is-better lifestyle. Then we grew with California, harnessing the vast energy of its sun, enlisting its spirit of technological innovation, including sustainable and organic farming, zero food waste and solar energy.
